

Dear Name A. Name:

I cringed when I overheard a conversation between two business people at lunch. “He washes and irons his own shirts,” one said. The other one chuckled and said, “It shows.”

Sad but true. You and I both know people who were passed over by someone less competent who simply *looked* sharper. Yet fixing the problem isn’t that hard, and it starts with losing the rumpled shirt. It’s amazing the difference a professionally laundered and pressed shirt makes.

It’s so much easier than washing and ironing at home, *plus it’s better for your shirts*. We use gentle, eco-friendly detergents. Water temperature is carefully regulated. Whites and colors are always kept separate. After pressing, *someone is always standing by to touch-up with a hand iron*. Missing a button? Tell us and we’ll sew on a new one, free.

If you already use our shirt service, please enjoy the above coupon with my thanks. If you’re new to our shirt service, please use the coupon and see what you’ve been missing.

Sincerely,

Penny Nichols, Customer Care Manager
